

Yoohyup (Aaron) Lee

+1 647-637-2030 | y342lee@uwaterloo.ca | [GitHub](#) | [LinkedIn](#)

TECHNICAL SKILLS

Programming Languages: C++, C#, C, Java, JavaScript, Python, Kotlin, Lua, Bash, R

Technologies/Tools: Unreal Engine, Unity, AWS, Perforce, Git, Jenkins, Adobe Suite, Blender, OpenGL

EXPERIENCE

Electronic Arts – Motive Studios

May 2025 – Dec. 2025

Software Engineer

Montreal, QC, CA

- Contributed to the development of the upcoming **Iron Man** title in **Unreal Engine 5** by implementing core UI systems for armor selection, flight systems, and telemetry events used for automated data collection
- Designed and implemented internal **ImGui** tooling for animators and programmers, including bone-highlighting features to streamline debugging workflows

Campfire Expeditions Inc.

Sept. 2024 – Dec. 2024

Full-Stack Software Engineer

Toronto, ON, CA

- Worked with **Cloud Firestore** to implement backend endpoints and cloud functions, and developed an in-game notification system using **Firebase Notifications**
- Helped ship *Campfire: Cozy Friends* from closed beta to **Steam Next Fest**, contributing to a **12% player increase** (1,058 new players)

Digital Extremes Ltd.

Jan. 2024 – Apr. 2024

Gameplay Programmer

London, ON, CA

- Implemented gameplay ability improvements using **C++** and **Lua**, applying **kinematic equations** to calculate projectile trajectories and parabolic motion
- Developed enemy AI behavior using **decision/behavior trees**, adding new melee attacks and resolving pathfinding and idle-state bugs

ZeMind Studios

Sept. 2023 – Dec. 2023

Mobile Game/VR/App Developer

Toronto, ON, CA

- Developed VR motion-tracking systems and UI components for a VR simulation built in **Unity** using **C#**, resolving issues through log analysis and **Jenkins** test reports
- Contributed to a VR meditation application by implementing UI systems and integrating a subscription workflow

Behaviour Interactive Inc.

Sept. 2022 – Dec. 2022

Gameplay Software Engineer

Montreal, QC, CA

- Worked on an unannounced multiplayer title implementing new gameplay mechanics, including weapon systems using modular design patterns
- Implemented a spherical camera system allowing players to orbit objects using **vectors** and **trigonometry**

PROJECTS

Fight Night

Creator, May 2026 – June 2026

- Developed a co-op multiplayer fighting game in **Unreal Engine 5** using **C++**, featuring server-authoritative networking and a custom utility-based AI opponent
- Implemented replicated combat, movement, and gameplay systems supporting two players controlling a single fighter
- Links: [Video Demo](#) | [GitHub](#)

Rhythm

Co-Creator, Sept. 2023

- Collaboratively developed a rhythm-based boss-fight game in **Unity** using **C#**, implementing gameplay systems and UI during a week-long game jam
- Links: [Video Demo](#) | [GitHub](#)

Nutri

Co-Creator, May 2024 – July 2024

- Built a nutrition-tracking Android app in **Kotlin** featuring barcode scanning via **AWS** and dietary analysis using the **ChatGPT API**
- Designed a serverless architecture utilizing the **Observer** and **Factory** design patterns
- Link: [Video Demo](#)

EDUCATION

University of Waterloo - Bachelor of Computer Science, Bioinformatics Specialization Sept. 2021 – Apr. 2026

- Relevant Coursework:** Data Structures, Algorithms, Operating Systems, OOP, User Interfaces, Linear Algebra, Numerical Computation, AI, Networks, Game Theory, Software Design and Architecture
